

Munden is Back in the Custom Enclosure Business!

Munden Enterprises is pleased to announce our new partnership with Valid Manufacturing Ltd., a proudly Canadian company based in British Columbia.

Valid is a leader in manufacturing custom enclosures and electrical assemblies.

Their expertise spans industrial, utility, transportation, wastewater and renewables markets.

At Munden Enterprises, we're committed to representing the highest-quality manufacturers, and Valid's focus on robust, reliable, and locally built solutions aligns perfectly with our values and our customers' needs.

This partnership brings Munden back into the custom enclosure space, giving engineers, contractors, and utilities across Atlantic Canada a trusted, Canadian-made option for even the most demanding applications.

Ready to explore Canadian-made custom enclosures? Munden is here to help—reach out today.

Utility, Metering & Terminations

Valid's collection of utility, metering and termination products encompass a wide breadth of integrated product options. These products are designed to comply with local utility metering standards and are certified to CSA standards.

Commercial Enclosures & Splitters

Valid's large selection of high quality enclosures and splitters are certified to CSA standards. We liaison with local utilities and inspection groups to provide products that comply with local standards and requirements.

Power Kiosks & Enclosures

Valid provides a large and continuously growing selection of kiosks and enclosures with options ranging from empty to completely customizable solutions. Our kiosks are compact and designed to enable ease-of-use in a single complete solution.

Pedestals

Valid manufactures and designs a large collection of quality pedestals available in a number of categories, including parking lot, campground and RV, utility, marine and rooftop.

Campground Distribution

Valid's selection of campground distribution centres are free standing, all-encompassing pad mount enclosures, used primarily for power distribution in campgrounds. The durable steel construction and weatherproof design ensures safe outdoor use.

EV Charger & Parking Lot Distribution

Security, protection and accessibility were the top priorities for Valid when designing the parking lot and electric vehicle charger distribution kiosk. The product offers convenient access and quality protection of EV chargers in areas where, if left exposed, are susceptible to damage and vandalism.

Cam-Lock and Temporary Power

This generator tie-in enclosure is designed to provide a user-friendly connection point for a portable generator into a power system's main service entrance equipment. The weatherproof cabinet has a while-in-use design to maintain a 3R rating while the generator cables are connected.

Temporary Power Products

Valid has developed a unique line of modular and camlock style distribution products. These products are designed to offer power on the go in any situation, whenever it is needed.
