

K series Heavy-duty Ferrule Crimping Tools

ITC introduces the K Series Heavy-Duty Ferrule Crimping Tools, designed for precise, reliable crimping of Large ferrules. With a smooth pre-clamp mechanism and high-compaction square crimping, these tools deliver strong connections with fewer operations.

The K05WF50 and K05WF95 models cover 25 mm² to 95 mm², providing dependable performance for heavy-duty wiring and panel assembly.

Features & Specifications:

- Square crimping for secure connections
- Pre-clamp lever for easy handling
- Ergonomic two-component handle with double-sided slip guard
- Rigid, lightweight handle tubes
- Smooth, low-effort mechanics
