## Fuse Blocks with Ground Bus Bar

### Simplify the Power Distribution of Your Connections

These Fuse Blocks offer a streamlined, cost-effective solution for consolidated circuit protection. Designed to accommodate Standard Blade Fuses, they ensure safe and efficient power distribution across your application. (Fuses sold separately.)

**TARIFF-FREE**
**Key Features:**

- Snap-on insulating clear cover with label recesses and spare fuse storage
- Screw-type terminals for secure and reliable connections
- Integrated negative bus bar for improved wiring organization
- Includes a sheet of pre-printed circuit identification labels

**Benefits:**

- Centralizes wiring for easy access and maintenance
- Provides enhanced protection with a durable insulating cover

**Specifications:**

- Maximum Voltage: 32VDC
- 4mm Stud Terminals (Input)
  - Recommended Input Wire Sizes: 6-4GA
- 5mm Screw Terminals (Output)
  - Recommended Output Wire Sizes: 16-12GA
- 4 x 5mm Diameter mounting holes

- Rugged Thermoplastic polymer housing & polycarbonate cover
- Maximum amperage per circuit: 30A
- Maximum amperage per block: 100A

Available in 6 or 12 positions. Clear cover included.

# of Positions	Dimensions (L x W x H)	Part #
6	4.92" x 3.74" x 2.32"	<b>*766099</b>
12	6.46" x 3.74" x 2.32"	<b>*766098</b>
