

Canada's innovators in **one room.**

The energy of the N³ Summit comes to life in our sold out exhibit hall at the Metro Toronto Convention Centre, where 100+ innovators from across Canada's advanced manufacturing and technology ecosystem are showcasing the solutions shaping what's next over two full days of connection and discovery. From automation, AI, robotics, quantum, defence, and homebuilding to advanced materials, digital platforms, and industrial services, our exhibitors represent the full spectrum of breakthrough capability and ambition. This is where leaders, partners, investors, and buyers connect with the companies building the future, sparking new partnerships, accelerating procurement opportunities, and turning bold ideas into real world impact.
